*Nutec Ceiling Insulation is packed in compressed rolls allowing for easy handling and storage. Lightweight and easy to transport and install. Manufactured from recycled PET (Polyethylene terephthalate (PET), a safe plastic used for beverage bottles). Hygienic, safe and odourless. No irritating itching from fibres. Suitable as insulation to all type ceilings and as a top up over existing applications. Compatible with all types of building materials. Non-corrosive action with steel, copper or aluminium. Non-hygroscopic, does not absorb moisture. Will not breed or promote fungi. Will not sustain rodents or vermin. VOC free; Zero% OPD; 100% Recyclable; No CFC's or HCF's; Non-irritant - itch-free.

*Think Pink Aerolite is a non-combustible, glass wool ceiling insulation solution that reduces the energy required to maintain a comfortable living environment. Unlike many competitive products that claim limited combustibility, Aerolite is a certified non-combustible product which means it won't burn, smoke, or melt in a fire as it's made from glass wool. Aerolite has exceptional acoustic insulation properties; it enhances your indoor environment by absorbing noise from the inside and outside. Aerolite is made of 80% recycled glass and our factories are CFC and HCFC free. Aerolite saves more than 100x the energy consumed and CO2 emitted from manufacturing, transporting and disposing – so you are on the right side of a sustainable future. The growing energy crisis and cost has forced a need to conserve energy and reduce electricity usage. Aerolite helps you save by limiting heat loss in winter and heat gain in summer.
